1. Package Config

❖ Class DataBase

```
1 package config;
2 import java.sql.Connection;
3 import java.sql.DriverManager;
4 import java.sql.SQLException;
5 import javax.swing.JOptionPane;
6
7 public class Database {
8     private static Connection connection;
9
10    public static Connection startConnection() {
11        String url = "jdbc:mysql://localhost:3306/pbo_modul_8";
12        String username = "root";
13        String password = "Passwords1";
14
15        try {
16            DriverManager.registerDriver(new com.mysql.cj.jdbc.Driver());
17            connection = DriverManager.getConnection(url, user: username, password);
18            System.out.println("Koneksi berhasil");
19
20        } catch (SQLException exc) {
21            System.out.println("Koneksi error : " + exc.getMessage());
22        }
23        return connection;
24    }
25
26    public static void closeConnection() {
27        try {
28            connection.close();
29        } catch (SQLException exc) {
30            System.out.println("FAILED TO CLOSE DATABASE CONNECTION : " + exc.getMessage());
31        }
32    }
33
34
35    public static void main(String[] args) {
36        Database k = new Database();
37        k.startConnection();
38    }
39
40
41
42
```

2. Package Model

❖ Book

```
1 package model;
2
3 import java.util.ArrayList;
4 import java.util.Collection;
5 import java.util.Set;
6
7 public class Book {
8
9     private int id;
10    private String authorName;
11    private String title;
12
13    public Book(String title, String authorName) {
14        this.title = title;
15        this.authorName = authorName;
16    }
17
18    public Book() {
19    }
20
21    public int getId() {
22        return id;
23    }
24
25    public void setId(int id) {
26        this.id = id;
27    }
28
29    public String getAuthorName() {
30        return authorName;
31    }
32
33    public void setAuthorName(String authorName) {
34        this.authorName = authorName;
35    }
36
37    public String getTitle() {
38        return title;
39    }
40
41    public void setTitle(String title) {
42        this.title = title;
43    }
44 }
```
